COLLEGE.

Having a difficult time keeping track of all your completed courses and grades? Need something to make your college application process a little easier?

With the High School Planner on CaliforniaColleges.edu, you can easily create a free, personal academic portfolio of your completed high school courses and grades—making the application process simple.

Go to www.CaliforniaColleges.edu. It's FREE.

How will it make my life easier?

Designed to help you meet the minimum college admission eligibility course requirements, the High School Planner keeps track of the A-G requirements you need to apply, plus it can automatically transfer all of the courses and grades in your Planner to any of the online CSU campus applications.

The Planner also allows your counselor to help determine what classes you still need to take in order to meet the minimum eligibility requirements for most colleges and universities in California.

How does it work?

You can start entering courses, both completed and planned, at any time. Throughout high school, you should update your Planner every time you finish a course and receive a grade. Make sure to check your progress toward meeting the A-G subject requirements whenever you visit the website.

Throughout your college selection and application process, you should also consult your high school counselor for information about specific college requirements and other courses to take in preparation for a college education.

To start using the High School Planner, follow these simple steps:

- 1) Create a FREE account and log on to CaliforniaColleges.edu.
- 2) Click on "Tools", scroll down to the Admissions section and then click on "High School Planner".
- 3) Select your high school under the "My High Schools" section of the Planner.
- 4) Begin adding your courses and received grades by clicking "Add" under the "My Courses" section.

Are you a transfer student?

Use the Transfer Planner to track completion of the IGETC and GE Breadth requirements!
